PREMIUM
FACADES

BUILDING
INSPIRATIONS

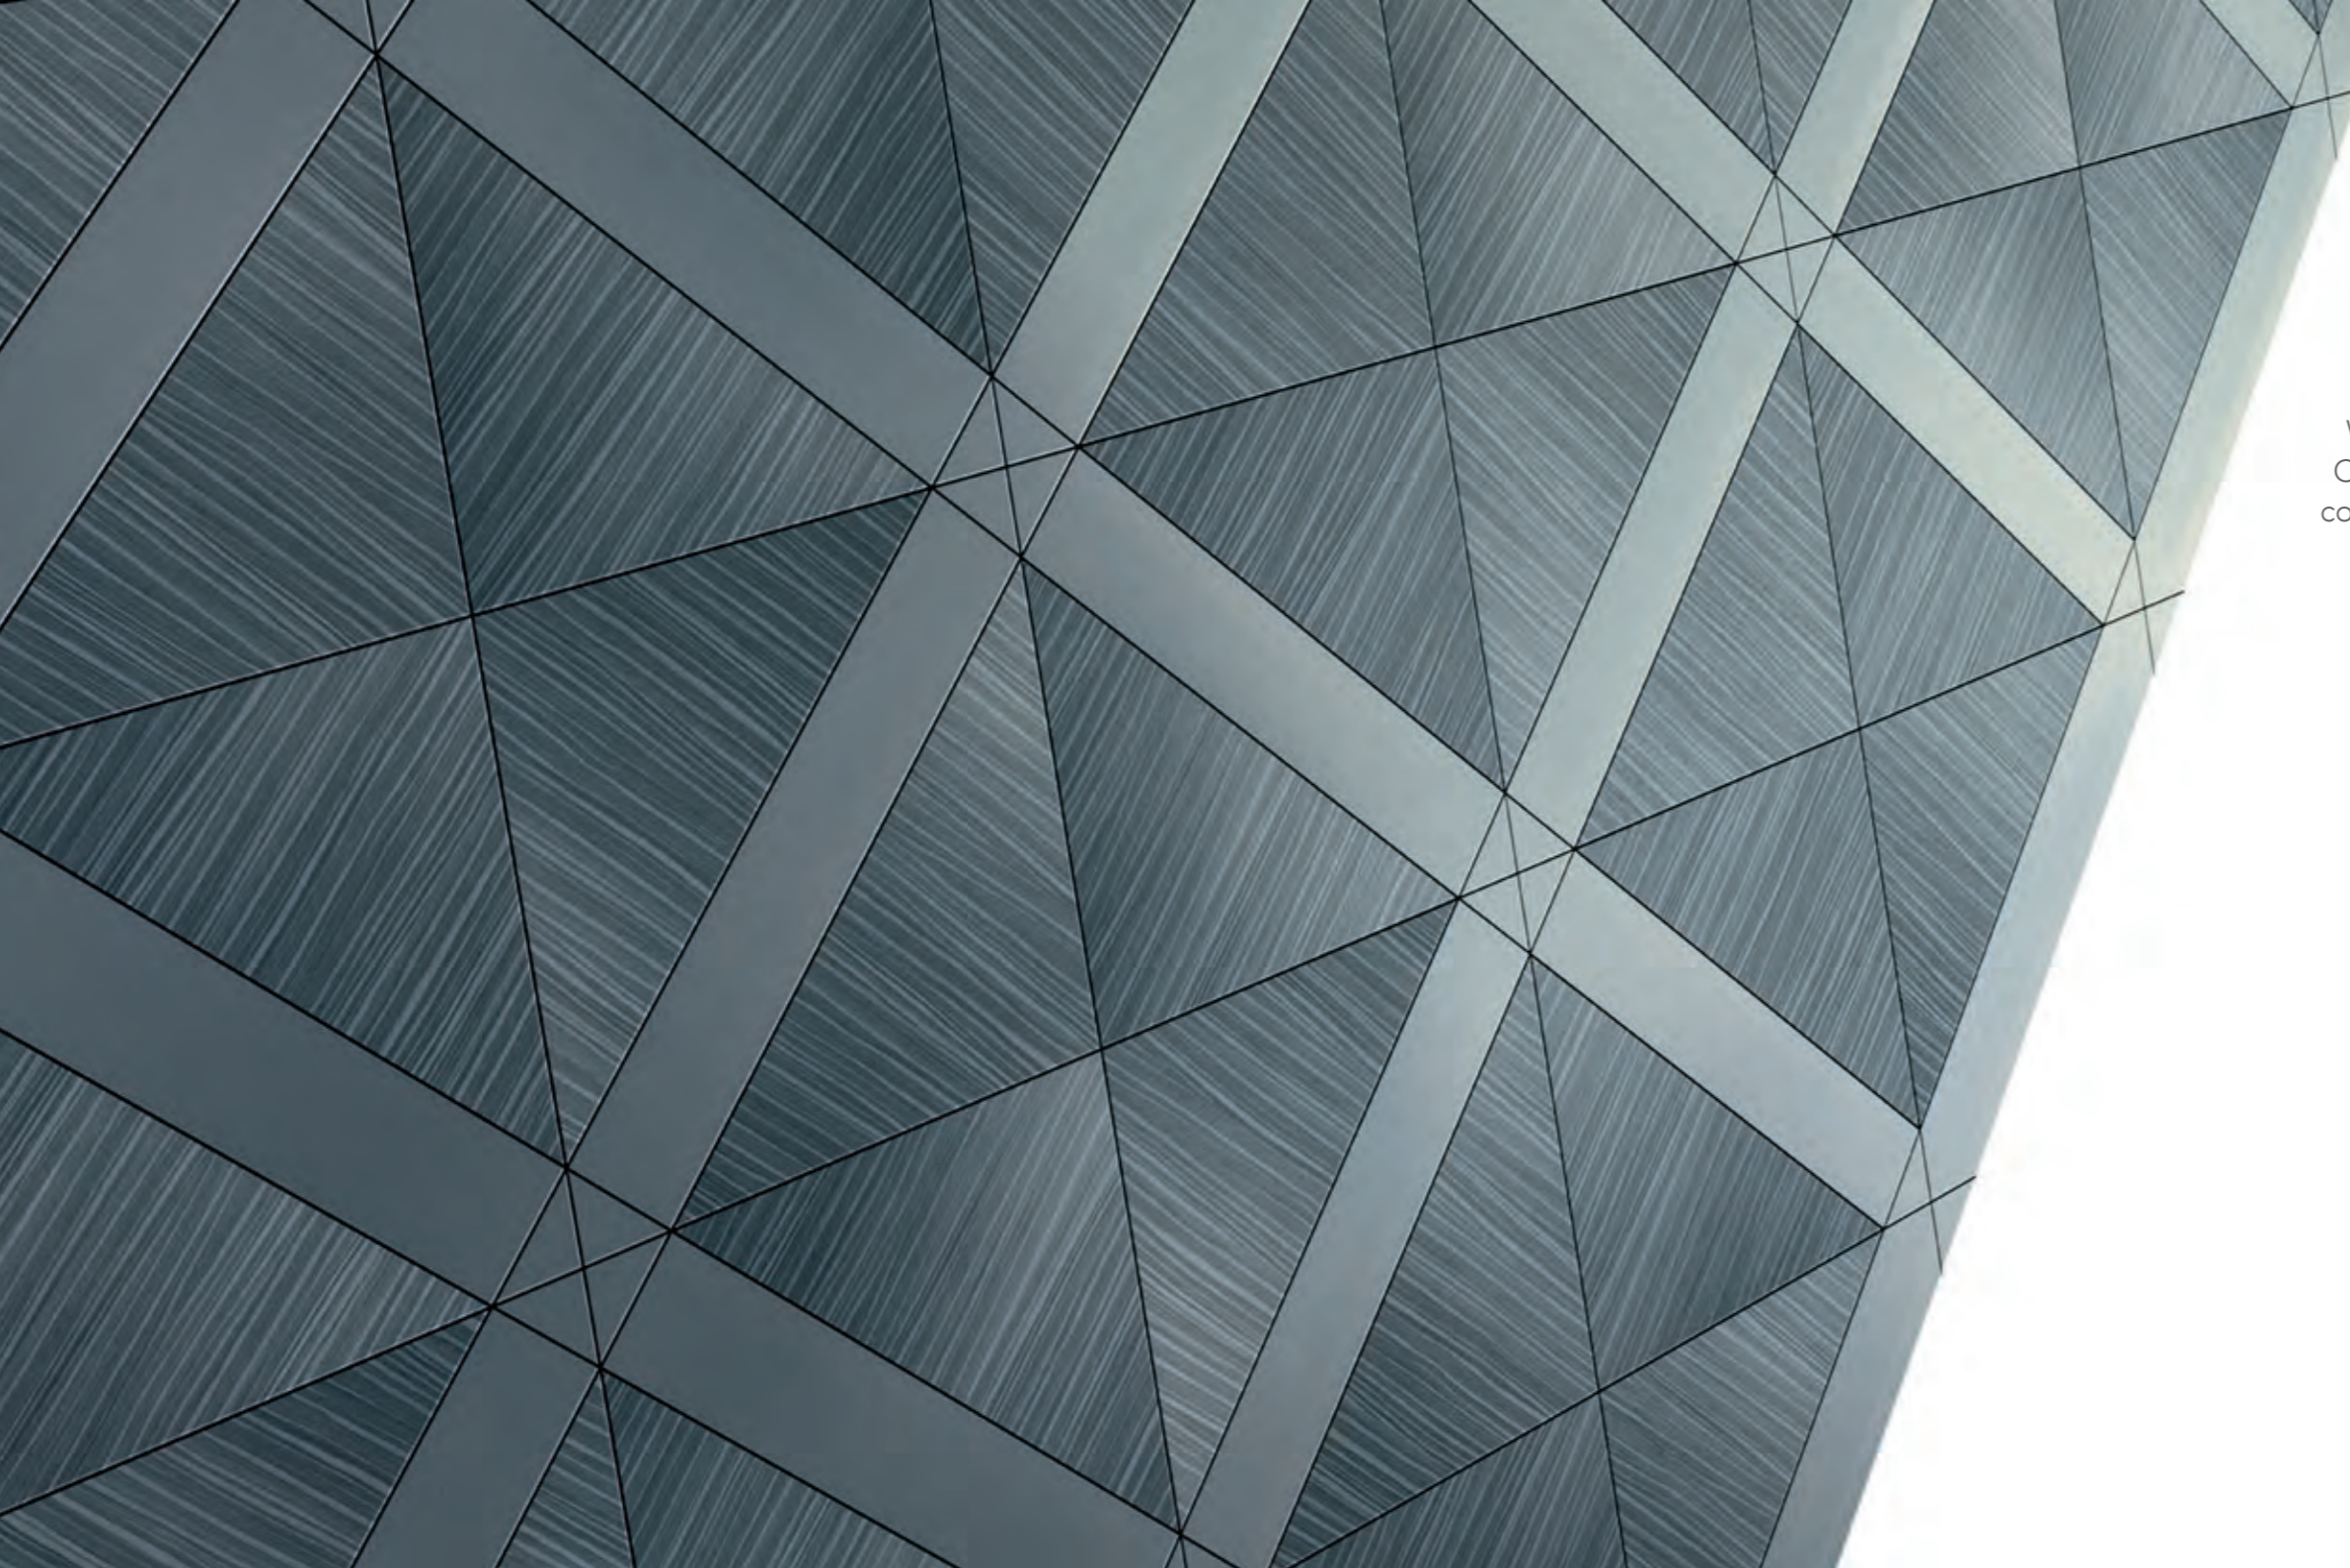

**Rockpanel Premium:
Adding new visions to your
imagination**

To create something truly incredible, you need complete design freedom. Your creativity goes beyond what is already made. So why not expect the same from the materials you work with? With Rockpanel Premium, we offer everything you need – and more.

Your creativity makes a
building unforgettable

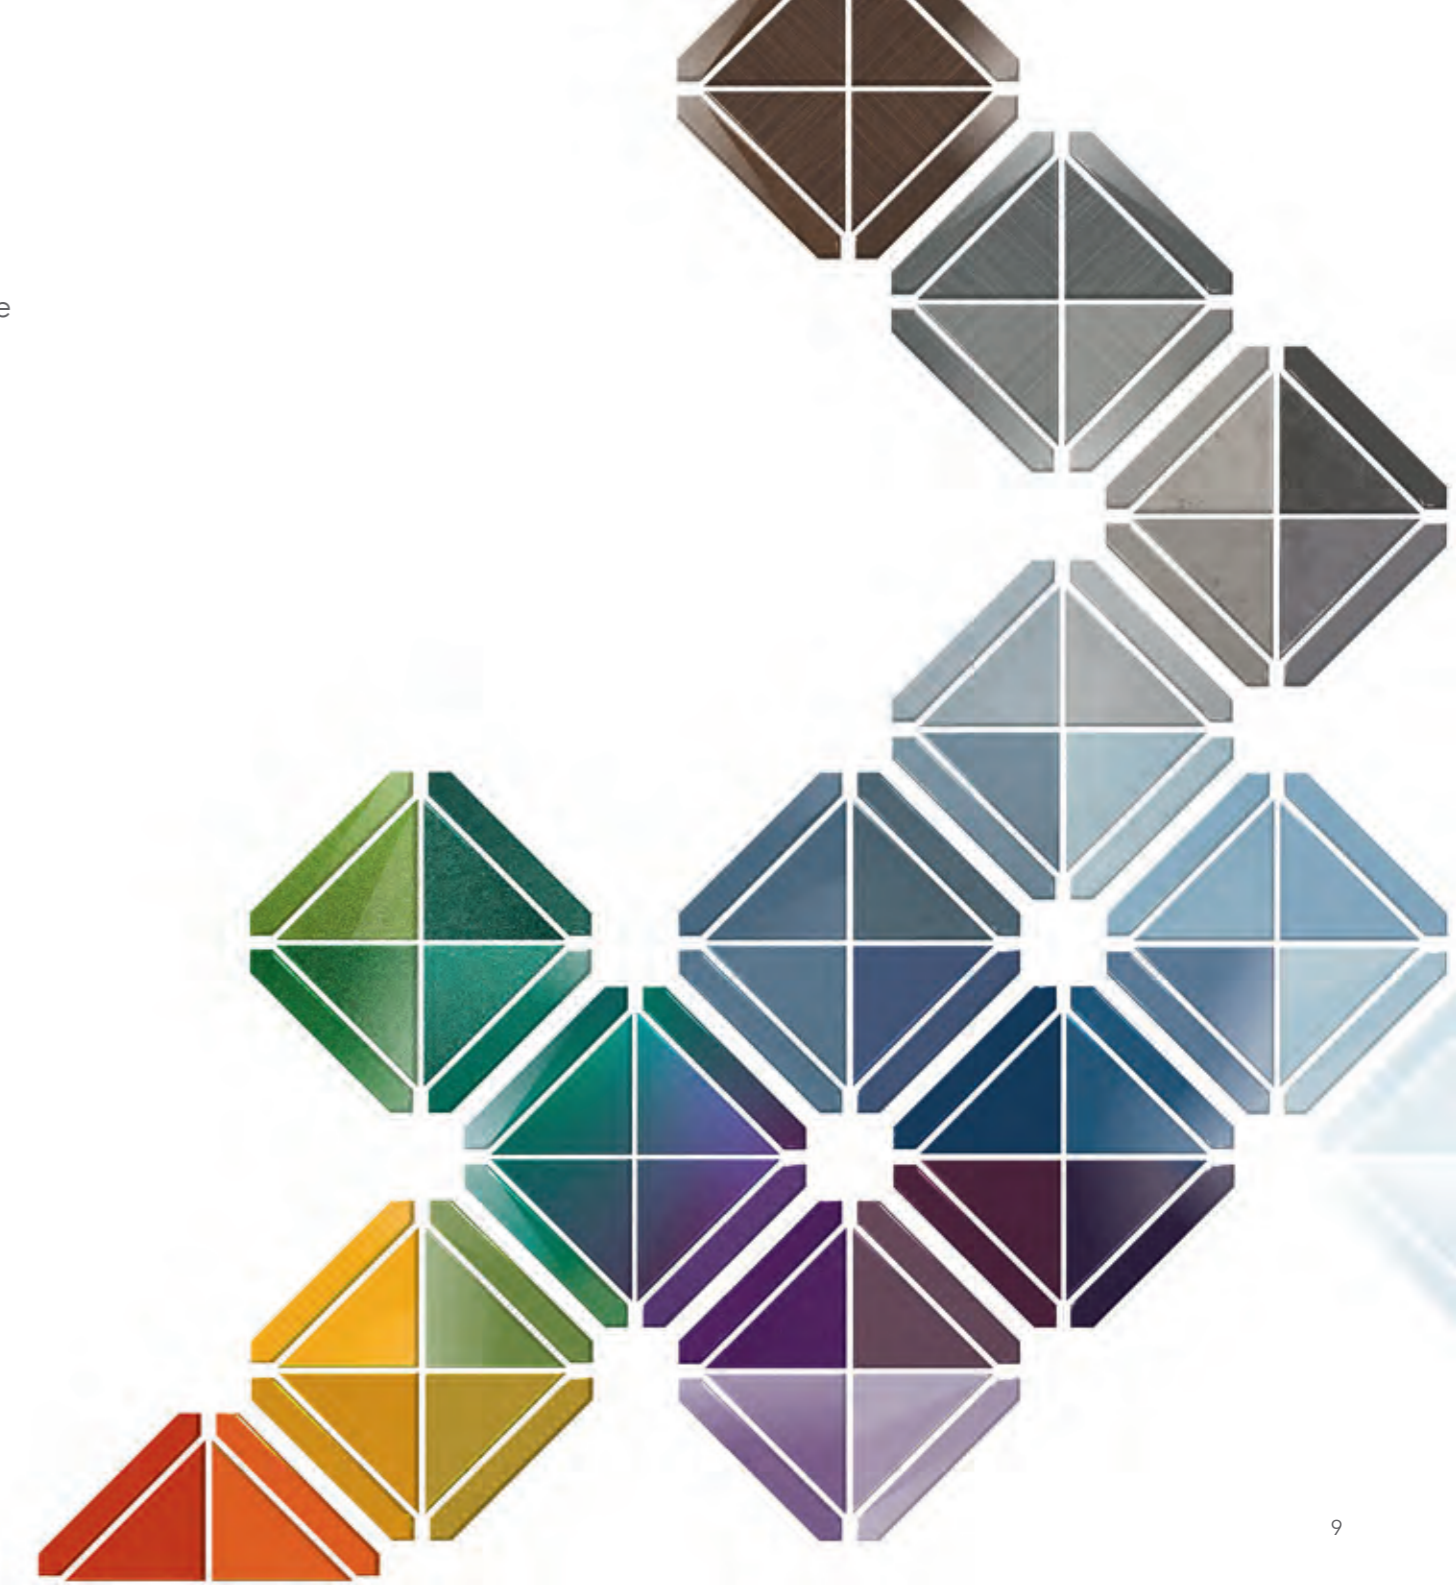

No matter how creative your design, Rockpanel Premium is up to the challenge. Whatever colour, design or shape you have in mind: we help you to push all boundaries.

Complete design freedom with Rockpanel Premium

Combine all of our colours, designs and finishes, anyway you want it. Why stay inside the box?

For example, mix the patterns of Rockpanel Woods or Stones with the effects of Rockpanel Chameleon or Metallics. And of course, any colour tone is possible.

Playing with light

Matt, semi-gloss or high-gloss?
It's up to you! Pick the finish that best
suits your design, or mix different gloss
grades for an even greater effect.

A fabulous finish

When realizing your project, you want every detail to be just right. That's why we offer three different gloss grades: matt, semi-gloss and high-gloss. Each level of reflection has its own character

Feel free to play with light to create your own perfect picture. And for an additional dimension, you can even combine our different finishes.

Keeping the beauty alive

All Rockpanel Premium façade panels come with a transparent ProtectPlus protective layer. For even better protection against UV radiation and environmental influences.

ProtectPlus coating

Façades have quite a lot to endure. Sunlight, wind, dirt, rain... Luckily, Rockpanel Premium boards are ready for even the toughest weather conditions. Because they have a ProtectPlus coating, they are very well protected against challenging influences from outside.

Next to optimum colour fastness, there's also the increased self-cleaning capacity. This means most of the dirt on the façade is simply washed away by rainwater. Even graffiti can easily be removed with a special cleaning agent.

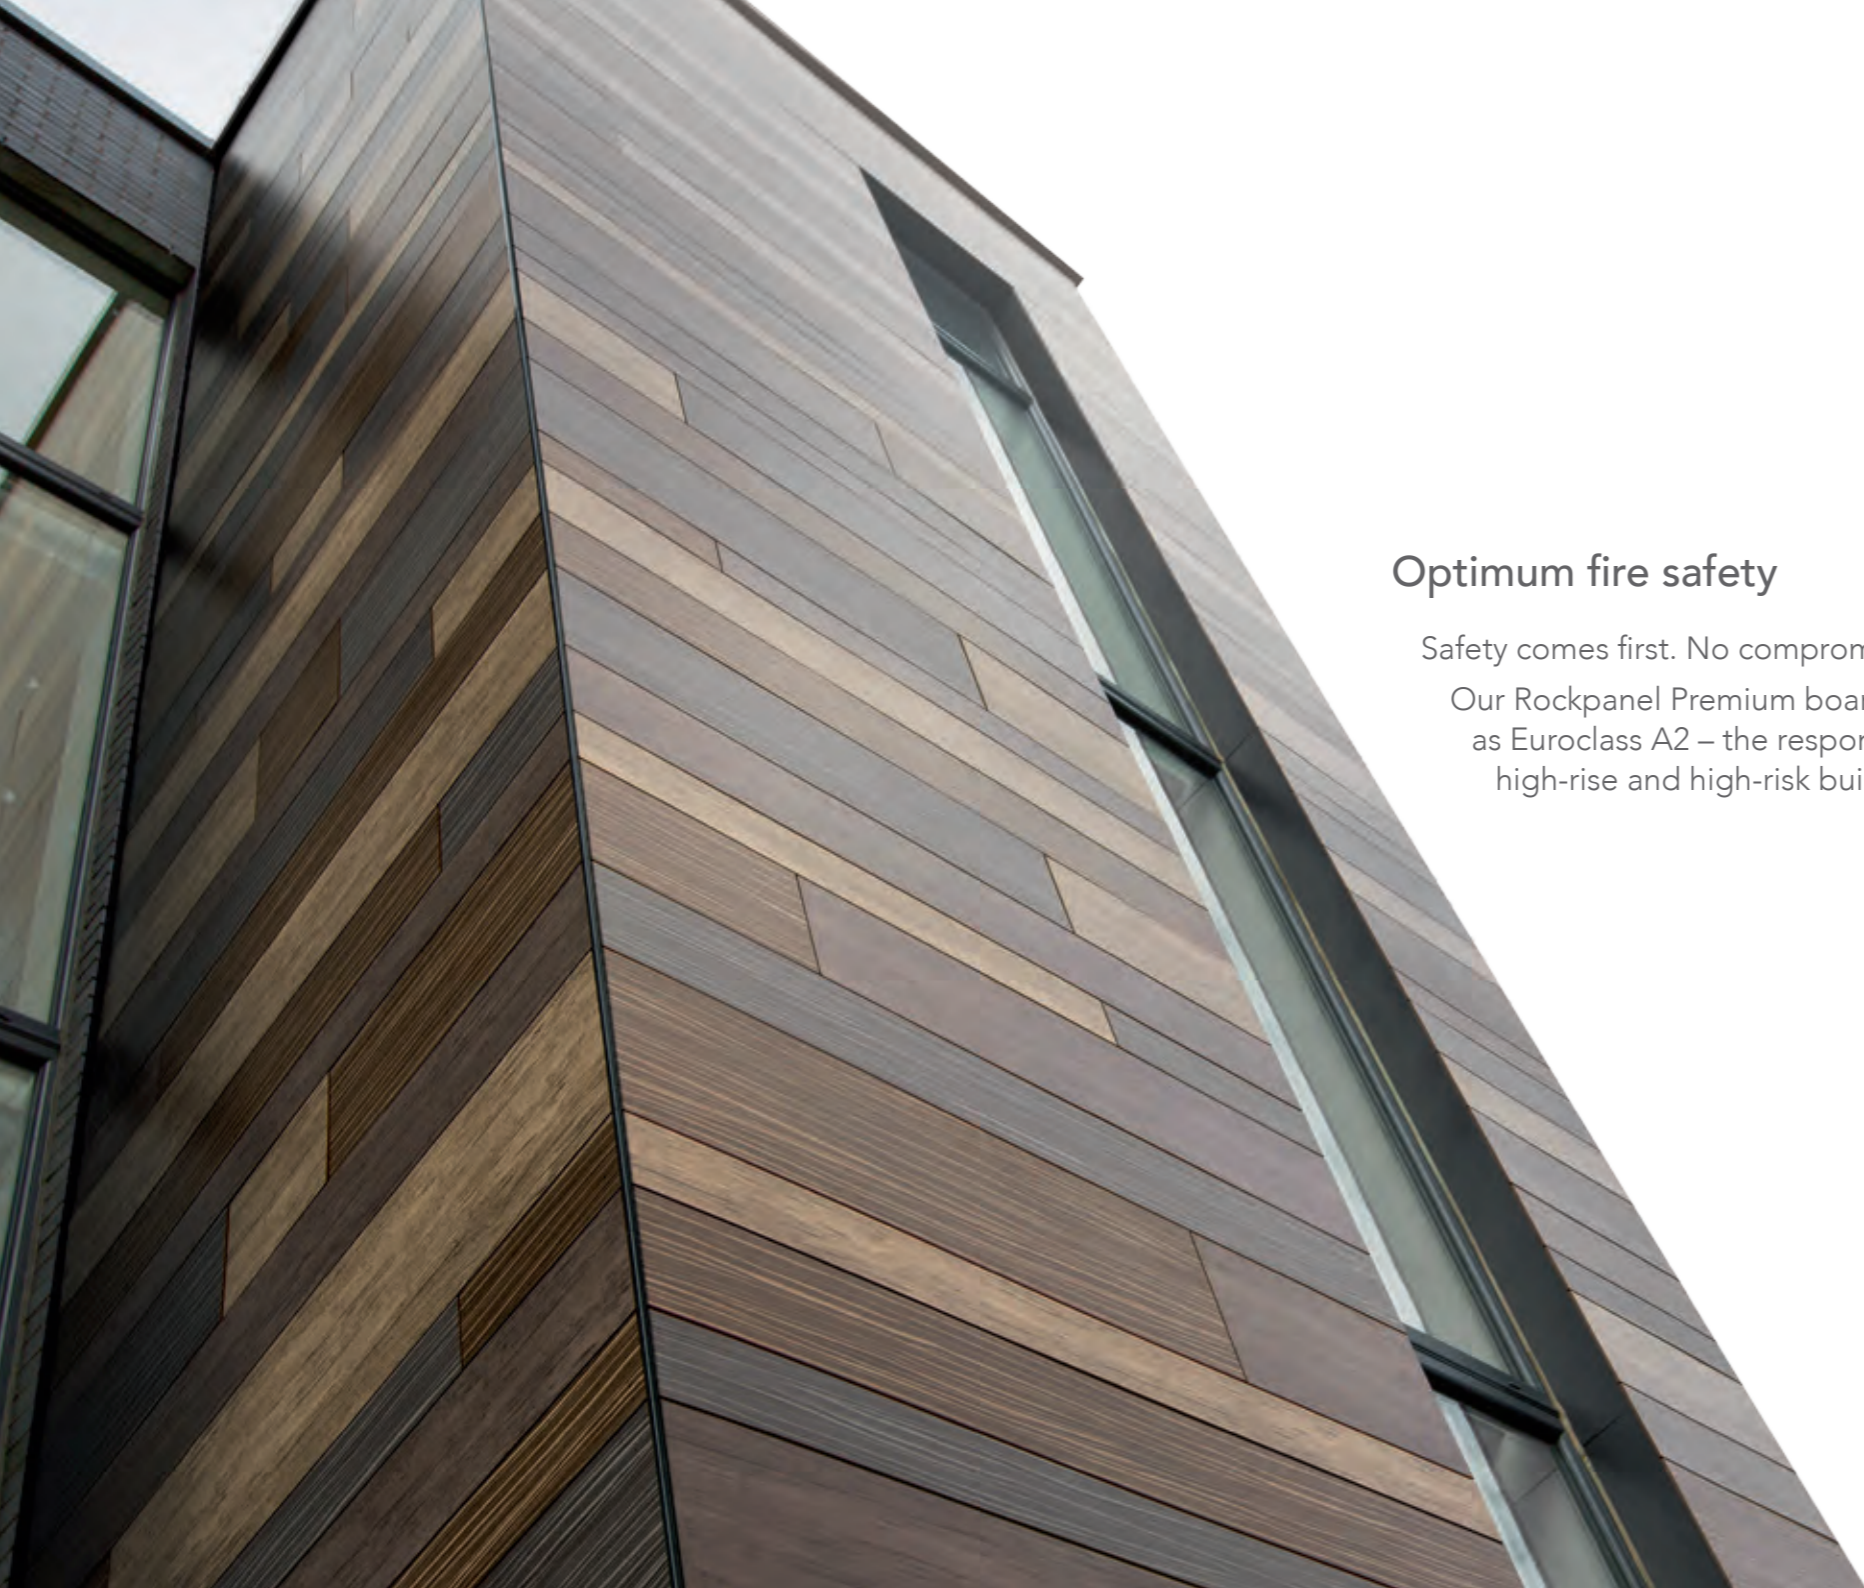

Rockpanel Premium façades are also insensitive to moisture. The base material, basalt, does not expand or shrink, even with big changes in temperature and humidity.

**Fire safety
comes naturally**

When it comes to protecting people's lives, you can never be too sure. Our naturally fire resilient boards are the safe choice.

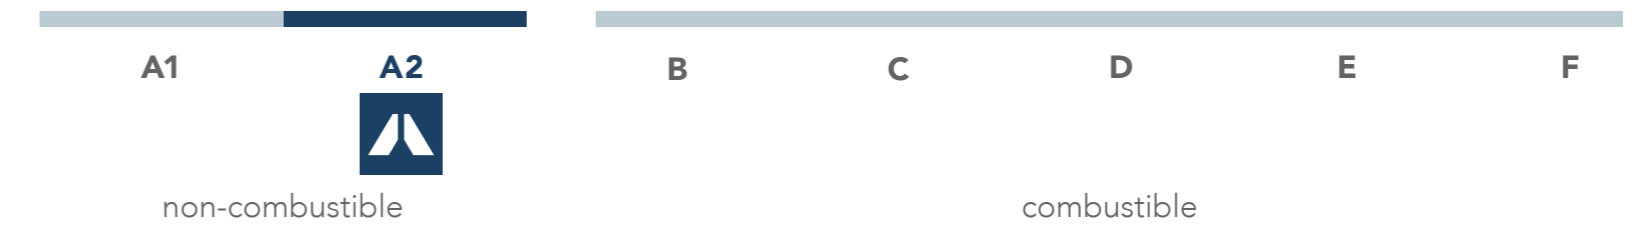

Optimum fire safety

Safety comes first. No compromises.

Our Rockpanel Premium boards are classified as Euroclass A2 – the responsible choice for high-rise and high-risk buildings.

Rockpanel Premium boards fulfil the highest European fire protection standard and are rated at Euroclass A2-s1,d0, non-combustible.

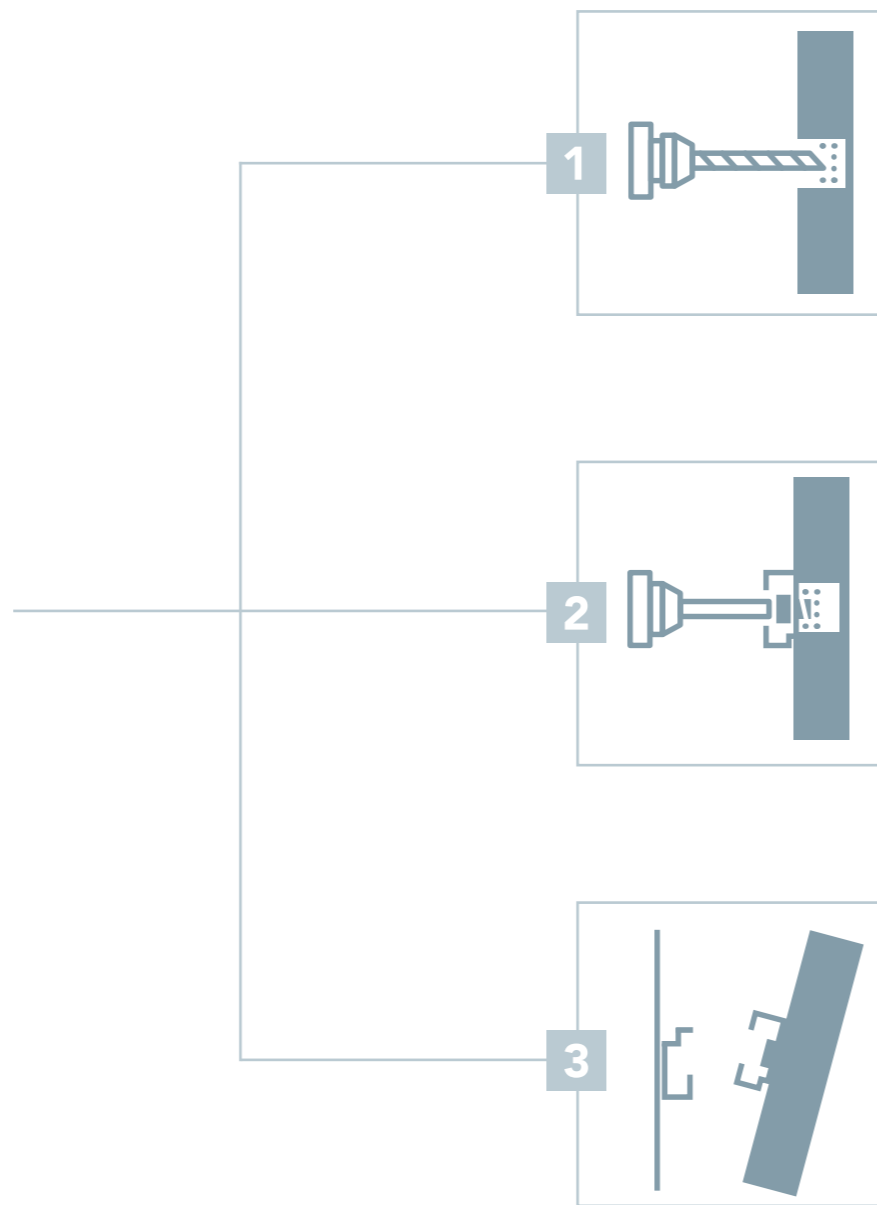

A flawless façade

No visible rivets or screws – just your flawless façade design. Use our concealed fixing system for Rockpanel Premium.

Aiming for nothing less than perfection?
Go for a flawless façade with Rockpanel
Premium and concealed fixing.

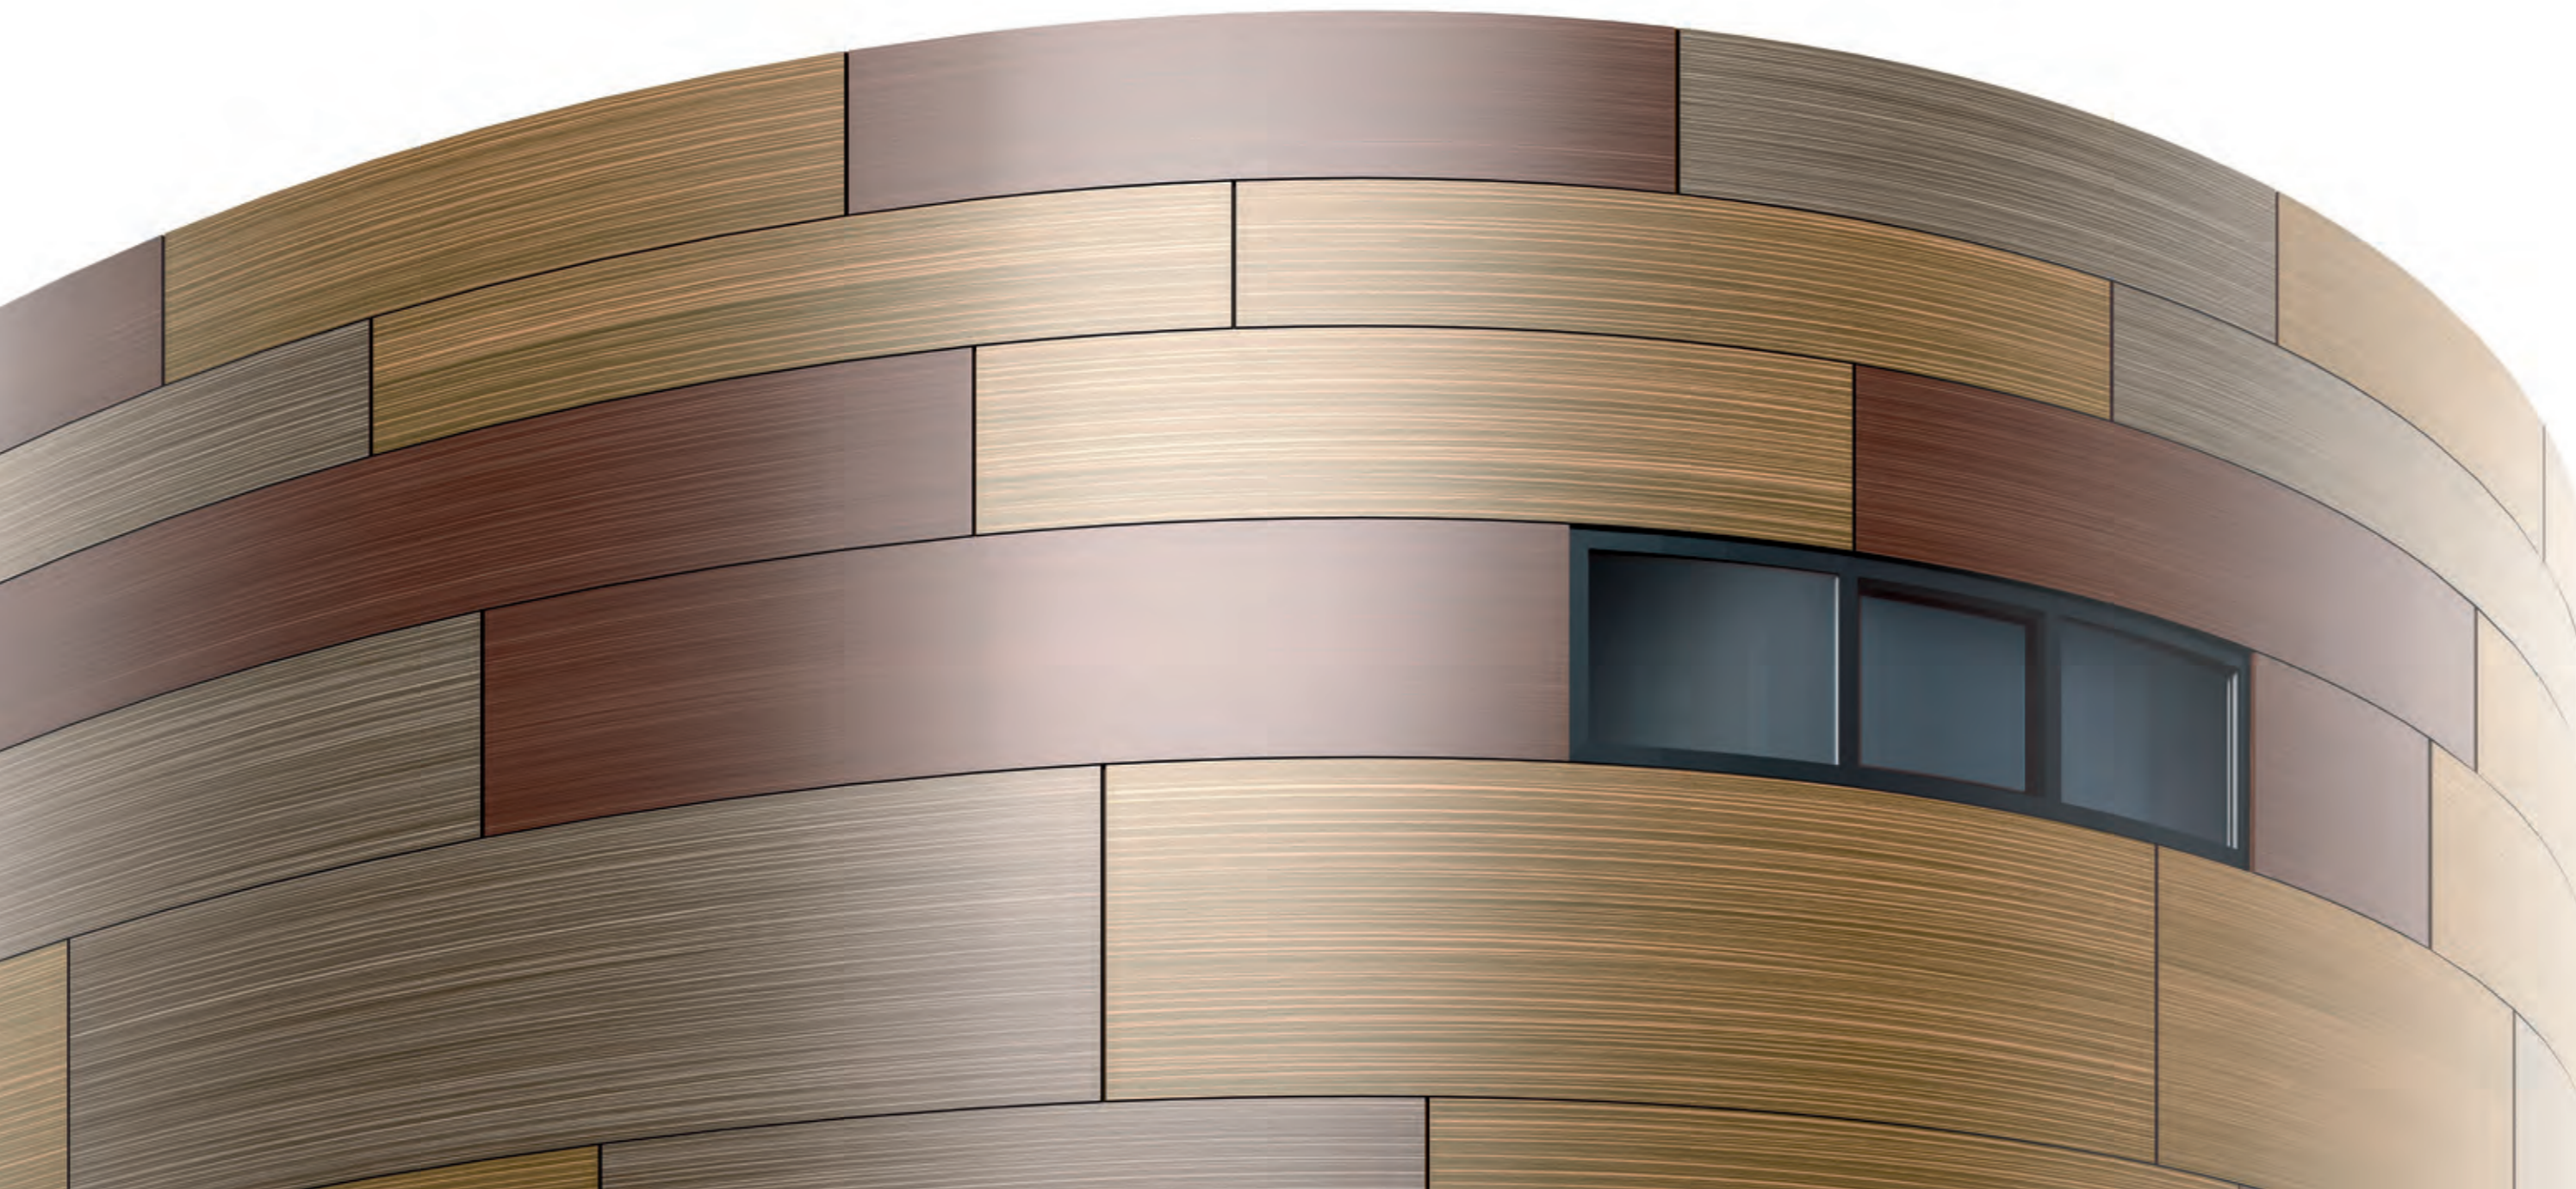

Your premium façade design deserves all the attention it can get. Opting for an invisible fixing method allows your design to optimally shine. Our concealed fixing system is not only a perfect solution from an aesthetic point of view, but also ensures a quick and easy installation and guarantees absolute stability.

Bend, shape and
form naturally

Follow the forms of nature.
Organic forms fit in beautifully
where corners and edges just
don't do it.

Bending and curving

Bend, shape and curve Rockpanel façade panels to achieve the form that suits your design vision. This can be done on the construction site to get it perfectly aligned to the shape of your building.

Let your façade communicate

Personalisation on a completely different level. Engrave or perforate your building to create unique pieces or art, messages or company logos.

Routing and perforation

Engraving a façade lets you make a very personal statement. It is an amazing way to bring across your message, literally letting the façade speak for itself. And as Rockpanel boards are insensitive to moisture, no special treatment is required afterwards.

**Easy handling for
brilliant designs**

Sawing and drilling without the need for special tools. Expand your creative space when it comes to façade design, with Rockpanel Premium.

Flexible and robust

As Rockpanel Premium boards are robust yet flexible and light-weight, the panels are easy to mount. And it can all be done with standard tools such as hand saws, circular saws, jigsaws and drills.

Don't limit your imagination.
Everything is possible.

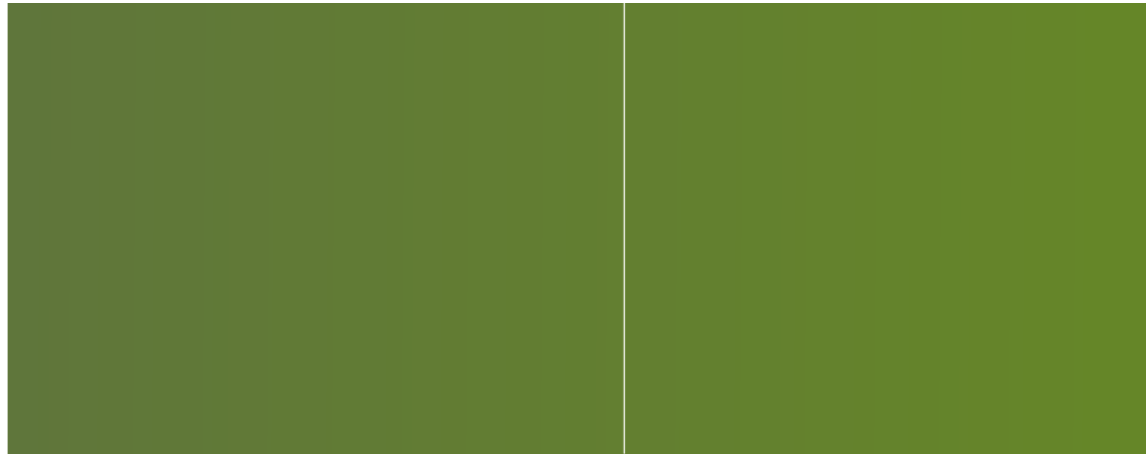

With Rockpanel Premium, you can create any façade you want. Pick one of our 200+ designs and colours, or go for a custom design. Our custom dimensions and full flexibility in handling ensure optimum efficiency and minimized cutting waste.

Perfection in all dimensions

To create the best looking result, Rockpanel Premium offers even more flexibility in dimensions. The boards are available in any length you need between 1,700 mm and 3,050 mm. For a beautiful, cost-efficient and practically no-waste result.

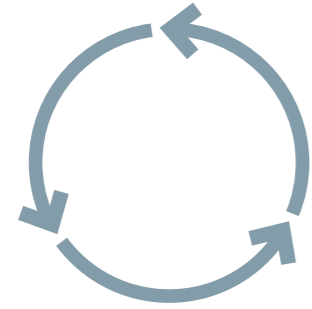

Rockpanel Premium
Thickness 11 mm

From nature, for nature

Rockpanel Premium façade panels, like all Rockpanel boards, are made from basalt - a natural material that does not deplete our natural resources.

Built-in sustainability

Sustainability is a key factor in everything we do. Take basalt, the basis material of our boards, which is virtually limitless in nature. A responsible choice, for now and the future. All Rockpanel façade boards have an official confirmed lifetime of 60* years. And after that, they are nearly fully recyclable.

* BRE Global confirmed lifetime 60 years/ETA lifetime 50 years
